BLUEJ TELEMETRY

Session overview and activity visualisations

OOP1 | Session Analytics

Project: OOP1ExampleProject

Student: STUDENT_ID_PLACEHOLDER

Session: 87b29f56 | 2026-11-07 12:00:00

3	66.7%	1	1
Compilation attempts	Compile success rate	Executions	Compiler errors

Estimated coding activity

Active: 6m 55s

Idle: 11m 25s

Activity estimated from observed edit/compile/execution events (60s active window)

Compilation results

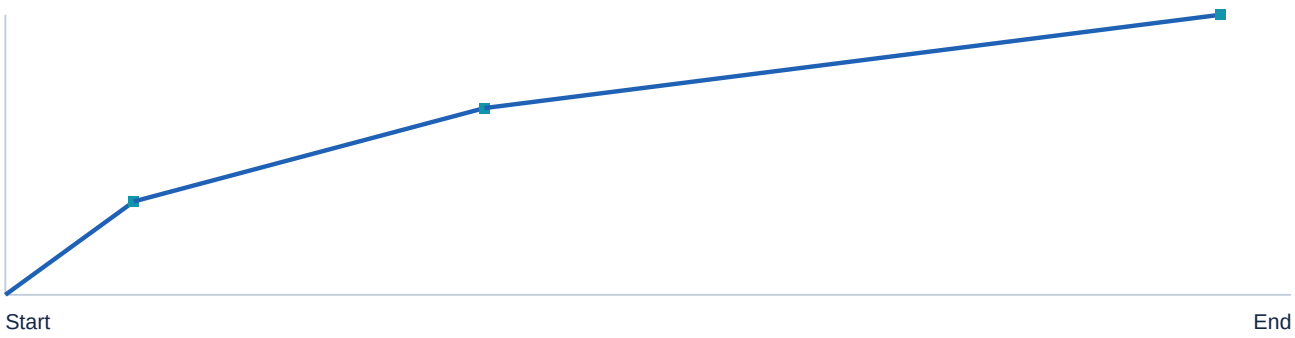
Successful		2
Failed		1

Compile intervals (seconds): [300, 630]

Runtime exceptions: 0

Manual console summaries: 1

Compilation activity over time



Editing and session statistics

Session duration	**1100 seconds**
Detected edit batches	**3**
Estimated changed characters	**103**
Estimated characters / active minute	**14.9**
Detected edits / minute	**0.2**

Metrics reflect sampling, not direct keystroke tracking.

BLUEJ TELEMETRY

Errors, lifecycle progression and collection notes

OOP1 | Session Analytics

Compilation error frequency

Error category	Count
SYNTAX	**1**

Class creation / deletion and method definitions

Timestamp	Event	Class / method
2026-11-07 12:00:40	METHOD_DEFINED	HelloWorld.greet()
2026-11-07 12:05:30	CLASS_CREATED	Calculator
2026-11-07 12:05:30	METHOD_DEFINED	Calculator.add()
2026-11-07 12:14:30	METHOD_DEFINED	Calculator.subtract()

Collection and accuracy notes

Edit cadence, active time and method detection are estimates from sampled source text.
Console text is imported by manual paste; standard compiler codes may be unavailable.
